

Automotive Crash Test Facility, China

MESSRING Systembau MSG GmbH

Service area	Contract value	Project duration
Infrastructure Planning, Geotechnical Engineering	(protected)	2 weeks

Project description:

The German company Messring has to design an Automotive Test Stand in China.

Their customer had provided soil-investigation reports in the local language, and some portions had been in handwriting. Messring was looking for a professional translation of the documents.

Further project data:

Expertise report:

- Geotechnical Engineering Investigation Report
- Schematic diagram of plane position of the draft building
- Engineering Geological Section Plan
- Borehole Log
- CPT Stratification Parameter Table
- CPT test results chart
- Soil test results table
- Consolidation test results chart
- Soil compression curve chart
- Formation characteristics table
- Soil physical and mechanical properties parameter table

Purpose:

- Investigation reports in Chinese language

Our services:

- Professional translation
- Absolute adherence to deadlines and confidentiality
- Quality guarantee

Client benefits:

- Native speaking translator
- Expertise experiences
- Knowledge of professional background
