

General repairment, reconstruction and modernization of the WWTP Dupnitsa, Bulgaria

Municipality of Dupnitsa, Bulgaria

Service area	Contract value	Project duration
Infrastructure Planning, Supply and Waste Engineering, Wastewater Management	€630,000	2009 - 2011

Project description:

The WWTP is situated west of Dupnitsa City. The WWTP discharges the treated waste water in the Djerman River, which is of second category (according to the Bulgarian Regulation). The main purpose of the WWTP is to treat the domestic waste water from the urban sewerage system, as well as the pre-treated waste water (by local WWTP) from industrial enterprises in the area. Water supply and sewerage, which is a municipal property, own the WWTP.

Further project data:

- WWTP was designed in 1974
- put into operation in 1982
- 81,929 PE
- 16,712 m³/d
