

EHS Audit, Milan, Italy

Kennametal

Service area	Value as of 2015	Project duration
Site Health and Safety Coordination	€350,000	2012 - ongoing

Project description:

Soil borings, analysis of soil samplings, groundwater sampling and monitoring activities.

Removal of USTs by means of a back hoe and preliminary verification of soil quality. Safety management during the execution of decommissioning activities.

Preliminary cost estimate for the goal of residential use of the site

Further project data:

- Preliminary estimate performed for two different design assumptions

Purpose:

- Investigate potential environmental liabilities
- Identify the best cost/benefit design approach for soil remediation and conversion of the area to residential use

Our services:

- Preliminary EHS investigation and audit
- UST removal
- Asbestos survey
- Environmental characterization and EHS risk assessment
- Cost estimate of the potential environmental liabilities

Client benefits:

- Reliable cost evaluation to overcome environmental liabilities
- Compliance with national environmental regulations
- Decommissioning project performed on-time and within budget
